- Automation

Williamsburg, Virginia  
2025 – present  
1 year

### United States Army Reserves, Information Technology Specialist

Serving as an Information Technology Specialist responsible for administering, maintaining, and securing enterprise network infrastructure in both garrison and field environments. Managed Windows and Linux servers, Active Directory, user accounts, and endpoint systems while ensuring system availability and compliance with DoD security standards. Provided Tier 1–3 technical support, troubleshoot network and hardware issues, and deployed tactical communications equipment to support mission operations. Collaborated with cross-functional teams to build, configure, and maintain secure, reliable IT environments under high-pressure conditions.
